Computational Intelligence

Andrea Calabrese
andrea.calabrese@polito.it

Hand it over. That thing, your
Github repository

Submit your repos!

- https://docs.google.com/spreadsheets/d/1ojzatmkNDZnjrYL-6u2wXQqvJaBA9dhzJ2KQFca6oVE/edit?usp=sharing

- Write your names and your github repo
  - Git or html links are both fine

First…

- https://github.com/squillero/computational-intelligence.git
- Pull request = “I follow the course”
- The more you follow the course…
- … the shorter the oral exam (you are so many! Wow!)

Set covering

- Minimize the number of sets

- You saw
  - Depth first
  - Breadth first
  - Best first (greedy)

- Now it’s time for A star to rise

Set covering

- A*
  - Heuristic H drives the algorithm
    - Admissible
    - Monotonic
  - Build a new H
    - Consider the old H (distance)
    - What about “special sets”?
    - What about the order of the sets?

Deadline

Thursday, 26/10/2023 h23:59 AOE

(dd/mm/yyyy)

You got a Star!
